DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Invention I. Claims 1-20, drawn to virtual address mapping, classified in class 711, subclasses 202 and 203.
 - II. Invention II. Claims 21-23, drawn to cache coherency, classified in class 711, subclass 141.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as use in a multi-processor system that maintains consistency between caches and main memory. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Also, because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
5. Lastly, because these inventions are distinct for the reasons given above and the search required for Invention I is not required for Invention II, restriction for examination purposes as indicated is proper.

6. Applicant is advised that for **the response to this requirement to be complete it must include an election of the invention to be examined even though the requirement be traversed.**
